

Turing Vision Quick Start Guide

Web Version

Congratulations on your purchase of a Turing Vision surveillance platform. Your hardware has been set up. All you need for a quick start is to activate and sign into your account.

TURING

Terminology

Account: The company or business you work for.

Alert: An intrusion – when a person or vehicle is captured in the camera stream – triggers an alert.

Bridge: A bridge connects your cameras to Turing Cloud. A bridge is associated with only one site.

Cloud: Turing Vision Cloud

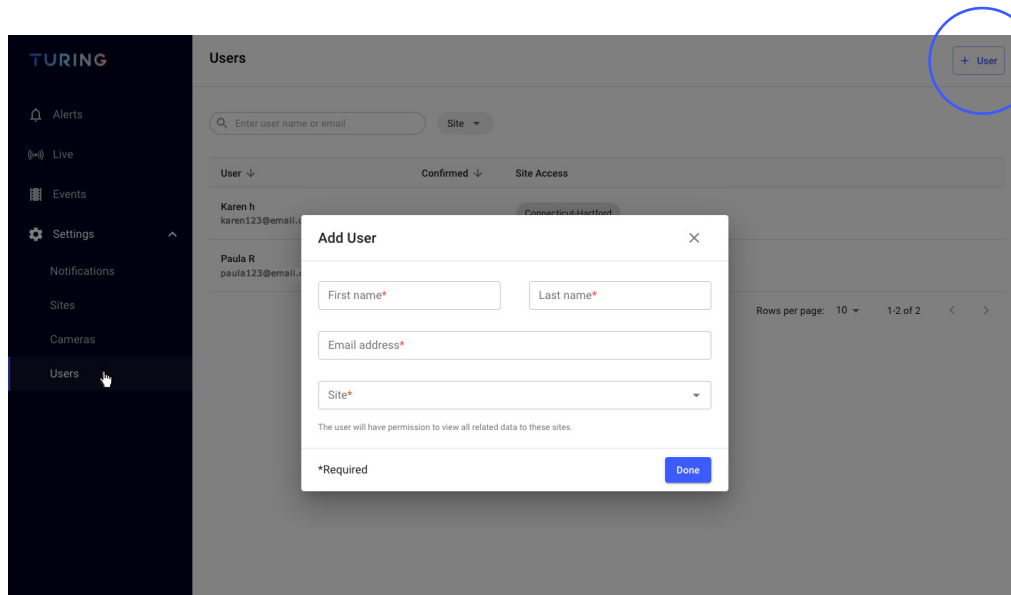

Notification: Email or text messages that tell users about alerts. Notifications are set up by admins and users (site managers).

Site: A Site is a logical grouping of cameras, as defined by your account. For example, you might define the west side of a warehouse as a Site. All the cameras along the west side follow the same rules for alerts and notifications.

Users

Turing Vision recognizes two kinds of user:

- **Admin** users can add or edit any users in their organization. Admin users can view camera feeds from any camera in their organization.
- **Users** are site managers. They can view only camera feeds of the sites assigned to them. Adding site managers/users is an important part of getting started.

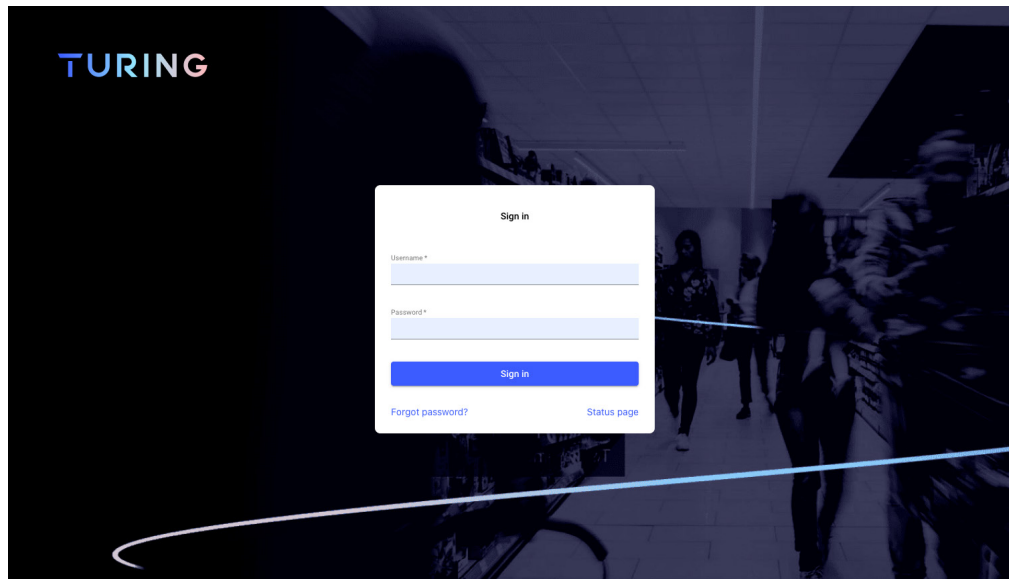

If you're an Admin, select **Settings > Users** on the left-hand menu. Click **+ User** to show the **Add User** box and set up a site manager.

The new user receives an email with an activation link, as shown in Activate and Sign in.

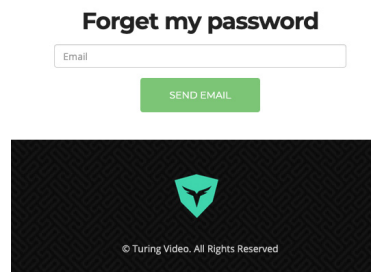

Activate and Sign in

Your Admin will send you an email that contains a link. Click the link and then create a password to activate your Turing account. Don't wait – the link will expire after 2 days.

 User/site manager only

Activation logs you into the Turing home screen. In the future, you'll use a Sign In box to access Turing Vision.

If you forget your password, click **Forgot password?** to reset it.

If you do not have a Turing Vision account, you may sign up by downloading the mobile application. Refer to the Turing Vision Mobile Quick Start Guide for more information.

Screen layout

Turing Vision screens display a menu bar along the left side. A working area covers the rest of the screen.

Alerts

False Alarm

Rows per page: 10 1-10 of more than 10 < >

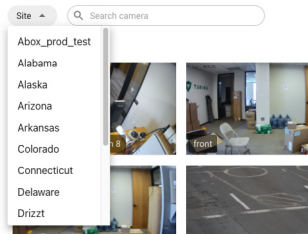

Live

Monitor a physical area in real time. Choose from all of the cameras connected to your account and sites.

LIVE STREAM

Select **Live** on the left-hand menu to see a live-stream of all the cameras for all sites.

Use the Site dropdown menu to filter cameras by site.

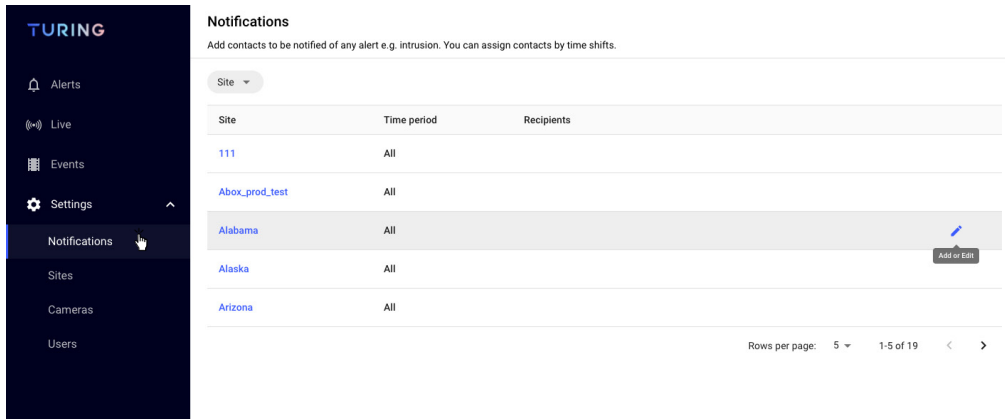

Enter a camera name in the **Search Camera** box to search for that camera.

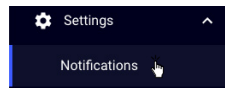

To focus on a stream, click its snapshot. The live stream fills your screen, so you see greater detail. Click X to return to all live streams.

Set Up Notifications

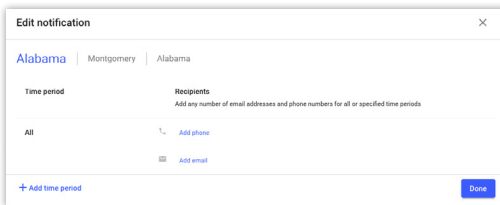

Notifications communicate important information that Turing Vision discovers in camera feeds. It's how employees who are on duty and responsible for a site get the information they need.

Set notifications up by site (logical camera group) and time period. On the left-hand menu, select **Settings > Notifications**.

Select a site on the **Site** menu and then click the edit pen.

Define notifications for that site. Phone number will be used for text notification.

Add as many time periods and notification recipients as you need. You can even send multiple notifications during a time period by adding multiple phone numbers and emails.

Events

An event is when a camera captures a person or vehicle in the camera stream. When searching for an event, you can select filters to narrow results. Filters include site, camera, and time range.

INTRUSION EVENTS

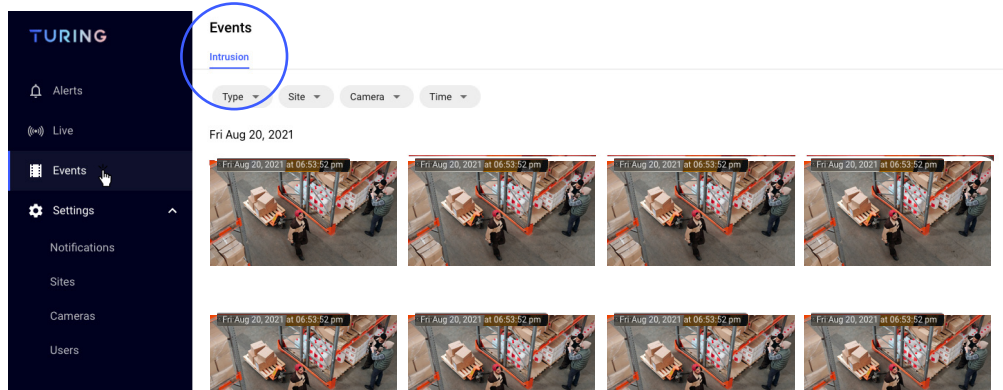

What's an Intrusion Event?

As part of system setup, your company can define special areas where you capture activity. When activity happens in those areas, Turing Vision saves it as an Intrusion Event. The two kinds of intrusion event are:

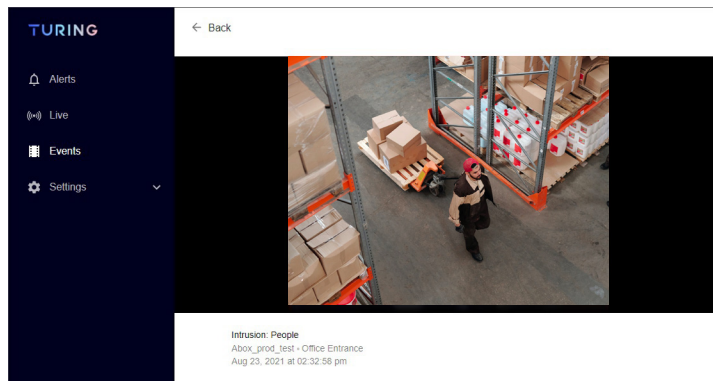

- **People** entering the area.
- **Vehicles** entering the area.

For example, you might have a camera stream that covers a busy street. You don't want to capture an event every time a car drives down the street. However, you can define the entrance to your parking lot as a special area where events are captured.

Events

On the left-hand menu, select **Events**.
Select **Intrusion**.

Each intrusion event is labeled with the site and camera where it was captured from.

To focus on an intrusion event, click its snapshot to see an enlarged image.

Click the **Back arrow** to return to all intrusion events.

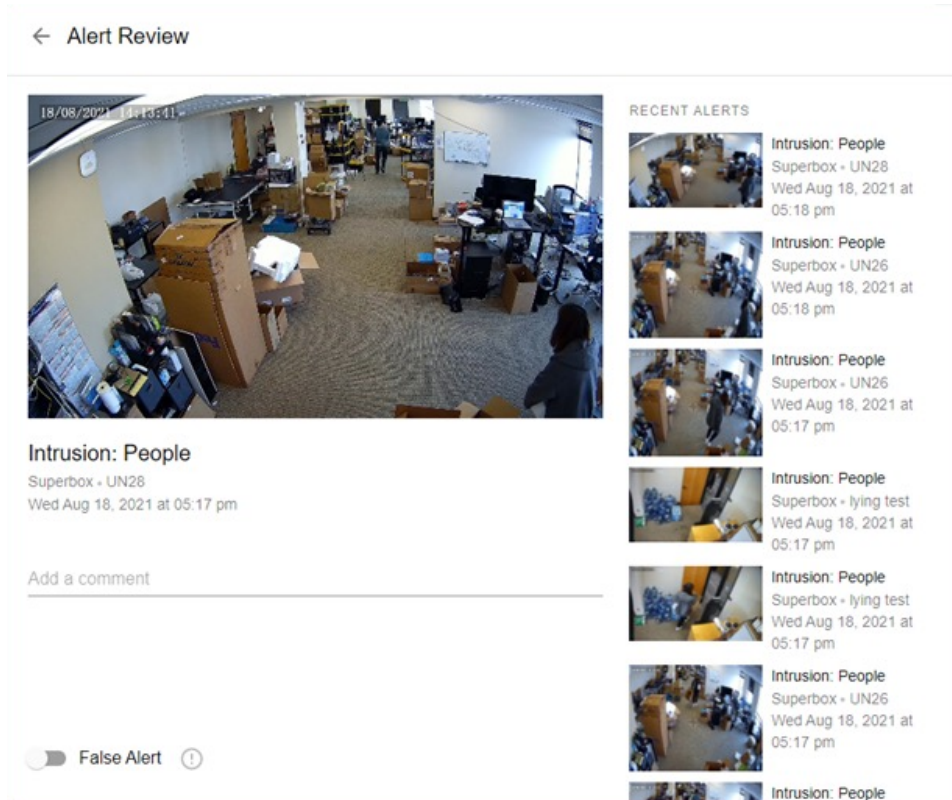

VEHICLE EVENTS

The ability to recognize vehicles - by license plate number, color, make or type - is coming soon.

PEOPLE EVENTS

The ability to recognize people is coming soon.

Alert Review

To focus on an alert, click its snapshot to see an enlarged image.

Snapshots of recent similar alerts (by people/vehicle, site, camera, and time) display along the right side of the screen.

You can add a comment about the alert or change its status to False Alert. If you change it to a False Alert, it no longer appears in the Alert list. You can find it in the False Alarm listing.

Click the back arrow to return to all alerts.

People

The ability to recognize people - by ID or face - is an important feature of Turing Vision.

The People feature is coming soon. This feature will enable you to identify all the people captured by your cameras.

Log out

The screenshot shows the Turing Vision web interface. On the left is a dark sidebar with the 'TURING' logo at the top. Below the logo are navigation links: 'Alerts' (with a bell icon), 'Live' (with a camera icon), 'Events' (with a calendar icon), and 'Settings' (with a gear icon). At the bottom of the sidebar is a 'Sign out' button. The main content area is titled 'Alerts' and has a 'False Alarm' button in the top right. Below the title are filter buttons for 'Alert', 'Site', 'Camera', and 'Time'. A table of alerts is displayed with the following columns: 'Alert', 'Site', 'Camera', and 'Time'. The table contains seven rows of 'Intrusion: People' alerts from 'San Mateo Eric' at various camera locations (OZHJ 015, 008, 003, 012, 013, 002, 001) on 'Thu Aug 19, 2021 at 03:39 pm'.

Alert	Site	Camera	Time
Intrusion: People	San Mateo Eric	OZHJ 015	Thu Aug 19, 2021 at 03:39 pm
Intrusion: People	San Mateo Eric	OZHJ 008	Thu Aug 19, 2021 at 03:39 pm
Intrusion: People	San Mateo Eric	OZHJ 003	Thu Aug 19, 2021 at 03:39 pm
Intrusion: People	San Mateo Eric	OZHJ 012	Thu Aug 19, 2021 at 03:39 pm
Intrusion: People	San Mateo Eric	OZHJ 013	Thu Aug 19, 2021 at 03:39 pm
Intrusion: People	San Mateo Eric	OZHJ 002	Thu Aug 19, 2021 at 03:39 pm
Intrusion: People	San Mateo Eric	OZHJ 001	Thu Aug 19, 2021 at 03:39 pm

To log out of your Turing Vision session, click your name in the lower left. Click **Sign out**.
