

AGENTIC AI MEETS SECURITY

WHAT'S NEW

Your Virtual Security Guard

Guardian AI Patrol

Designed for Periodic Inspection:
Customize detections on demand and automate proactive security.

Custom Prompts

Easily tailor alerts with custom inputs to detect very specific activities.

Automated Alerts

Receive automated alerts and snapshots instantly when rules trigger.

Multi-Channel

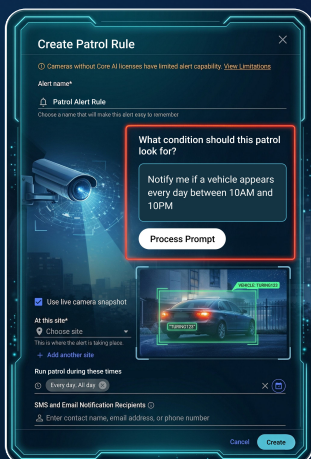

Get updates across your preferred channels: Email, SMS, Push & Webhooks.

Versatile Scenarios

Built for diverse environments—perfect for complete, reliable safety.

Define Your Own AI Patrol Rules

"Is the front desk unattended from 10AM to 5PM?"

"Let me know when someone is lying on the floor"

"Tell me when the door is blocked by boxes"

Eliminates Manual Patrols

Automates routine camera checks with scheduled, rule-based patrols — freeing your team from time-consuming manual reviews.

⊗ Replaces: Time-consuming manual inspection rounds

Monitor What Matters

Define your own AI rules to watch for specific conditions (safety violations, open doors, unusual activity) — no generic alerts.

⊗ Replaces: Generic, one-size-fits-all false alarms

Proactive Detection

Continuously inspects environments and surfaces issues early — helping teams act decisively before incidents escalate.

⊗ Replaces: Reactive incident investigations
